

# Kapish Bhardwaj

Solution Consultant at Caelius Consulting

Experience: 4+ years experience in IT Industry

E-mail: [kapish.bhardwaj@caeliusconsulting.com](mailto:kapish.bhardwaj@caeliusconsulting.com)

## Experience Summary

- Expertise in DataWeave transformation in Mule ESB.
- Good understanding of implementing Business Logic, creating Mule Flows using Connectors, Transformations, Routing, and Error Handling in Anypoint Studio.
- Expertise in integration with Salesforce, ServiceNow and NetSuite, Amazon Dynamo Db, Anypoint MQ.
- Experience in working with a variety of Mule Modules: Scatter-Gather, Object Store, DataWeave Scripts, Database, Web Service Consumer, SMTP Emails, SFTP, NetSuite Connector, Salesforce Connectors, CloudHub Deployments.
- Well versed with working on custom modules like Error Handler.
- Expertise in migration:  
Mule 3 to Mule 4, Mule 3.8.x to Mule 3.9.x  
Experience in developing secure, scalable and robust applications by leveraging security modules, API-Led Connectivity and MUnit with good code coverage.
- Well acquainted in using Anypoint Studio in creating various flows to integrate client/server systems.
- Good experience in designing and consuming RAML.
- Extensive experience in working with Anypoint Platform features like Anypoint Design Center, Anypoint Runtime Manager, Anypoint Exchange, Anypoint API Manager and Anypoint Monitoring.
- Experience in using Cloud Hub and on-premise Deployment environments, GitHub, Bitbucket, and Azure Repos.
- Hands on Jitterbit Modules:  
Harmony Cloud Studio, Design Component Palette, Transformation and scripts, Creating Schedules, Creating Email Notifications. Consuming Web Services.
- Smooth communication with clients through calls and emails for proactive analysis, identifying improvement areas, prioritizing and sorting the issues.
- Ensure all work is documented in accordance with required standards, methods and procedures.
- Excellent analytical skills to understand Business processes and functionality to translate them into System Requirement Specifications.
- Made design documents and also used Lucid chart for making sequence diagrams.

## Technical Skills

### Mule ESB:

Mule Runtime 3.x & 4.x,  
Mule ESB Flows,  
DataWeave, Connectors and Components

### Languages/Framework:

DWL (DataWeave Language) 1.0,  
DWL (DataWeave Language) 2.0,  
RAML, JSON, JAVA/J2EE,  
XML, WSDL, PL/SQL, Spring MVC,  
Spring Boot, Hibernate

### Integration Tools:

Anypoint Studio (Mule 3 & Mule 4),  
Design Center (RAML),  
Eclipse

### Databases:

MySQL,  
Microsoft SQL Server,  
Oracle

### Web Technologies:

Web Services (REST/SOAP)

### Version Control:

Git, Bitbucket, Azure Repos.

### Build/Testing:

MUnit, Postman Client

### Logging & Monitoring:

CloudHub Anypoint Monitoring

### Other Application/Tools:

Apache Maven, Active MQ,

### Proprietary Platform:

Lucid Chart

## Certifications

- MuleSoft Certified Developer – (Mule 4) by MuleSoft

## Work Experience

### Project: 1

Service: An American restaurant chain focusing on casual dining and online ordering.

Role: Senior Solution Consultant (MuleSoft)

#### Responsibilities:

- Developed API's for SOAP and REST based Web services to integrate third party functional modules into the core application.
- Integrated with NetSuite for ERP data.
- Extensively worked on DataWeave Transformations.
- Extensively worked on components like Batch Processing, Scatter Gather, Choice routers, Object store, Transformer, Caching Mechanism, Flat File Pattern, and Secure Properties.
- Migrated API's from Mule 3 to Mule 4.
- Developed MUnit Test cases for API's.
- Worked on console and database logging.
- Worked on Unit Testing and Integration testing of the API's.
- Used Lucid chart for making sequence diagrams.

Environment/Applications: Anypoint Runtime Manager, Anypoint API Manager, Anypoint Studio, NetSuite Platform, Teams, Microsoft SQL Server, Git.

### Project: 2

Service: With more than 20 years of experiences in the network industry, a mobile operator strives to provide unlimited high speed broadband internet connections and home entertainment solutions for residential customers, also complete connectivity and ICT solutions for enterprise customers.

Role: Senior Consultant

#### Responsibilities:

- Integrate MuleSoft with Salesforce.
- Provide billing updates on Salesforce on timely basis.
- Register new users on Salesforce.
- Used SFCD connector over there like bulk upsert, query, and get bulk job state info v2.
- Used send email connector, spring security on API's.
- Build APIs as per MuleSoft recommended API LED ARCHITECTURE.

## Work Experience

### Project: 3

Service: World's leading food processing technology company, headquartered in Germany. In 2018, the company generated consolidated revenues of around EUR 4.8 billion. The food and beverages sector accounted for around 70 percent of this total. The company is listed on the German MDAX.

Role: Consultant

#### Responsibilities:

- Integrate Amazon RDS with MuleSoft.
- Used connectors of Amazon Dynamo Db like Scan, Query.
- Build design documents of the app/API.
- Worked on multiple SFTP connectors like Move, Delete, On New or Updated File, Read, Write.
- Made tax calculation API's.
- Made design documents and also used Lucid chart for making sequence diagrams.
- Used compression modules like Decompress (Gzip decompressor).

### Project: 4

Service: Project involved Authentication against Active Directory, Authorization, Displaying the Employee data and updating the profiles of Employee.

Role: Application Developer

#### Responsibilities:

- Created API for login of Employees.
- Integrated the application with Oracle Database using Hibernate.
- Used REST API to integrate with the Active Directory.
- Worked on security of web services with spring security.
- Module for giving different Authorities to different levels of users (Spring Security).
- Check for existing User's from Active Directory using LDAP.
- Create Web Application for the process like authentication, display and updation.
- To implement Session Factory for Profile updation.
- To implement JDBC Template.

Environment/Technologies: JAVA, Spring Boot, Hibernate, Security, Tiles, Web-Services and Tag Library, JavaScript, jQuery, Ajax, JSP, JSTL, HTML, Git.

### Project: 5

Service: Online Hiring Test for Placement Drives.

Role: Technical Associate (Oct 2020 – Dec 2020)

#### Responsibilities:

- Created web application for taking an online test.
- Store Registration Form data of new Candidates in database.
- Authenticate Registered Candidates using Spring Security.
- Implemented Admin portal functionalities like allowing candidate to appear for test, check total scores of candidate, adding/editing questions to the test, updating profile of candidate.
- Implemented Audio and Video services.

## Education

BE (Bachelor of Engineering)

CGPA : 7.93
