## PERSONAL PROJECTS

### Expensify

- This is an expense tracking app where users can maintain a data of comparison between their income and expenses spent. Users would be able to see a responsive pie chart of the data filled in by them.
- Technologies used- **React, Redux Toolkit, Node Js, Express JS, MongoDB.**

### Contact List App

- This is a contact list app where users can add and delete their contacts. Also I've added an update functionality too in this app.
- Technologies used- **Express JS, EJS and MongoDB.**

### Chatting Engine

- This is a chatting engine which is hosted locally where more than one user can send and receive messages.
- Technologies used- **Express JS, EJS, MongoDB, Socket.io, Passport Js**(for authentication).

### Todo List App

- This is a todo list app where users can add their daily tasks and delete them on completion.
- Technologies used- **Express Js, EJS and MongoDB.**

### Stopwatch

- This is a stopwatch app where you can set, stop and restart time.
- Technologies used- **HTML, CSS and JavaScript.**
