Work Summary

Proficient in leveraging Flutter's powerful framework to deliver seamless cross-platform solutions that meet client objectives and user needs. Adept at collaborating with multidisciplinary teams to bring ideas from concept to implementation, with a strong focus on code quality, performance optimization, and user experience

Skills

- Dart
- Flutter
- Firebase
- Kotlin
- Java
- Responsive & User App Design
- Project Management
- Performance Evaluation and Optimization

Experience

OrbitNext Pvt. Ltd. | Jaipur, Raj
Mobile Application Developer
08/2024 – Present

- Recommended improvements to facilitate team and project workflow.
- Analyzed code and corrected errors to optimize output.
- Employed integrated development environments (IDEs).
- Reviewed project requirements to identify customer expectations and resources needed to meet goals.

W3care technologies | Jaipur, Raj
Android Developer
08/2022 – 07/2024

- Implemented a REST API integration that dynamically retrieved and synchronized data from the server to the mobile application
- Utilized the latest features of the Flutter SDK to create a dynamic and immersive user experience
- Developed a mobile application that supported multiple languages and different devices with minimal performance impact
- Utilized state management techniques to create a responsive and reactive user interface
- Developed an authentication system with secure user authentication and authorization

Sunarc technologies | Bikaner, Raj
Android Developer
05/2021 – 07/2022

- Developed an Android application with a modern user interface and intuitive user experience
- Leveraged the Android SDK to integrate device-specific features such as state manage
- Implemented user interfaces, activities, and services for mobile devices.
- Created custom UI and UX designs for Android applications.
- Optimized code for better performance and memory utilization.

Education

Jecrc Foundation | Jaipur

B.tech CSE - 2016 - 2020

Sardul sr. sec. school | Bikaner

Sr. Secondary(RBSE) - 2015 - 2016

Central Academy Sr Sec. School | Bikaner

Secondary(RBSE) - 2013 - 2014

Projects

Jaipur Chakki

Developed a dynamic E-commerce application focused on household items, including staples like Aata, groceries, and other household essentials. This app features a seamless user experience with robust shopping capabilities and an intuitive interface.

-
- Separate apps were designed for end-users and delivery personnel, ensuring optimized functionality for each role.
- Integrated a chat feature that allows users to communicate directly with the admin for support or inquiries, enhancing the customer service experience.
- Utilized the GetX package to manage state efficiently, ensuring smooth user interactions and quick updates.
- Users can place orders and track them in real-time while delivery personnel are equipped with tools to manage deliveries efficiently.

SKYAP

Developed a comprehensive online vehicle auction platform in Flutter using Dart, and GetX for state management. The app consists of two separate versions: one for buyers to participate in live auctions and purchase vehicles, and another for employees to manage live auctions via the app and web interface.

- Developed in Flutter using Dart to create cross-platform applications for buyers and employees.
- Implemented real-time bidding system for live vehicle auctions.
- Designed intuitive and responsive UI/UX for easy navigation and participation in live auctions.
- Built features for auction scheduling, notifications, and alerts to keep users updated.
- Implemented backend APIs and database integration to fetch vehicle listings, bids, and user information.

Mphilo

Developed a cross-platform mobile application inspired by Naukri and LinkedIn, allowing users to search for jobs, connect with professionals, and apply for positions. The app features a dynamic feed for job postings and user profiles, messaging between users, and the ability to upload resumes and manage applications.

Implemented efficient state management using GetX for smooth navigation and real-time updates.

- Job search and application functionality
- Profile creation and updates with professional details
- Real-time notifications and messaging
- Dynamic and customizable feeds for job recommendations and connections
