OBJECTIVE

To secure a challenging position as a Software Tester where I can employ my knowledge of automation tools, manual testing methods, and bug tracking systems.

EDUCATION

2017-21

- **B. E. Mechanical engineering**
St. Joseph's institute of technology
7.69

EXPERIENCE

30 May
2022 - 3
Jan 2023

- **Customer Support Associate**
Concentrix
Concentrix
1. Responding to Emails within a specific timeframe, with 100 percent accuracy
2. Dealing with senior management escalation, nodal and grievances complaints
3. Clarify team members' doubts in the absence of SME / team leader
4. Efficiency to offer relevant and satisfactory solutions to the customers.
5. Maintaining positive response with the customers throughout the conversation.

May 22-
2023 - Jun
20-2024

- **Associate Software Engineer**
Expleo Group
1. Collaborated with Developer and Functional teams to deliver features aligned with Testing Strategies
2. Worked in Automation testing for bug detection, conducted root cause analysis, and implemented fixes
3. Designed robust test automation frameworks with Python for scalability and efficiency.
4. Developed Java and Selenium scripts for web app testing, ensuring accuracy and efficiency.
5. Integrated automated tests into CI pipelines, identified defects and collaborated for timely resolution.
6. Conducted both manual and automated testing for network products and protocols, ensuring comprehensive coverage.
7. Executed Test plans meticulously, logged defects, and tracked them to resolution, maintaining thorough documentation.
8. Improved continuous testing processes and methodologies by providing feedback, suggesting enhancements, and staying updated with industry best practices.

PROJECTS

- **ANB (Arab National Bank)**
1. Played a key role in the ANB project by focusing on the performance testing domain for 5 months.
2. Utilized JMeter extensively to conduct performance tests, ensuring the robustness and scalability of the building system.
3. Worked on the Load test, Sanity testing, Middleware test, Regression test, Endurance test, EOD test, Debug test, and Fail over test and made a clear output for every log of the scripts.
4. Demonstrator proficiency in file handling, managing, and manipulating data efficiently to support testing and analysis efforts.

SKILLS

Sql

Java

HTML & CSS

Selenium

Test NG

Jenkins

GitHup

Cucumber
