About Me

Aspiring Full Stack Developer with expertise in MERN & MEAN stacks, problem-solving, and UI/UX design. Passionate about building scalable web applications, optimizing user experience, and continuously improving technical skills in a fast-paced environment.

Professional Experience

Veranda Race | Angular Intern

Oct 2024 – Nov 2024

- Developed and deployed a scholarship system on a live website, enabling student and donor registration.
- Designed and implemented individual dashboards for students and donors to manage profiles, track updates, and view details.
- Built an admin dashboard for real-time monitoring and management of student and donor data.
- Integrated backend services for seamless handling of registrations, donations, and dashboard interactions.

Singar Skilling Center | Full Stack Developer

June 2024 – Oct 2024

- Engaged in intensive training focused on the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Developed hands-on projects involving full-stack web application creation.
- Gained expertise in front-end and back-end development, database management, and deployment.

Projects

NGO Management System | React

- Developed a full-stack web app to manage NGO activities, sponsor interactions, and event tracking.
- Tech Stack: React.js, Node.js, Express.js, MongoDB
- Implemented donation tracking & real-time event updates.
- Designed an intuitive dashboard for donors & volunteers.

UI/UX Design for Food Delivery App | Figma

- Designed a food delivery app in Figma, focusing on intuitive navigation, responsive design, and user-friendly interfaces.
- Developed user experience flows for browsing menus, placing orders, and tracking deliveries, ensuring a seamless user journey.
