EDUCATION

Vellore Institute of Technology, Bhopal, India
Bachelor of Technology in Electronics and Communications

GPA 8.4/10.0
June 2018 - May 2022

ABOUT ME

A skilled MuleSoft developer with exceptional problem solving skills and strong interpersonal skills looking forward to work in an ideal yet dynamic work environment. I work exceptionally well both as an Individual and a team player.

WORK EXPERIENCE

Accenture, Bangalore, INDIA

MuleSoft developer

July 2022 – Present

- Preparing the design documents, Production Runlist and Checklist to ensure the alignment of all cross functional teams.
 - Designing and developing Rest and soap APIs from scratch by creating **RAML**, implementing the flows and securing them by enforcing required **policies and contracts**.
 - Debugging, analyzing, monitoring the developed APIs to troubleshoot and resolve the bugs or issues reported by the operations team.
 - Publishing articles on new integration solutions and connectors as a contribution towards the MuleSoft community.
- Project 1:**
- Utilized custom connectors for logging ensuring the logs to be brief enough to troubleshoot and triage issues with all the cross-functional teams which **improved the efficiency of the team by 25%**.
 - Developed Munit tests to achieve **coverage of more than 90%** resulting in **30% less bugs** reported to the team.
 - Built integration to **reduce manual effort to 20%** by leveraging platform apis to get the details of apis deployed on different environments and send the email to the team dl on the first week every month.
 - Worked on Infor to Workday integration which utilized **PGP module** to encrypt the data and **SFTP module** to read the file from infor SFTP and write the file to workday SFTP.
- Project 2:**
- Collected and documented user requirements, engineered design specifications, developed Salesforce integration for customer search functionality; **boosted overall customer satisfaction scores by 45%** through enhanced app performance.
 - Successfully migrated complex SOAP API from Mule 3 to Mule 4, leveraging Mule 4 features and best practices to **decrease the response time by 25%**.
 - Worked with NetSuite connector to build NetSuite system API to automate the business processes and synchronize the data with NetSuite.
- Project 3:**
- Built and tested the integration for creating a draft requisition, attaching the file for the requisition and creating the purchase order change leveraging **OAuth 2.0** which raised **the business satisfaction by 20%**.
 - Leveraged Cloudhub connector for creating alerts and Custom logging to ensure fast troubleshooting and analysis of bugs which **increased the efficiency of the team by 30%**.
 - Worked on migrating the APIs from **cloudhub 1.0 to cloudhub 2.0** with all the dependencies and solutions which was appreciated by the client.
 - Built api to sync data between snowflake and salesforce org leveraging the concept of **pagination** and pub-sub modules by using **VM queues**.

Summary

- Utilized 10+ diverse range of connectors including Salesforce, NetSuite, FTP, HTTP, File, Object Store, SFTP, Java, VM, Email, and Database.
- Proficient in Routing, Batch Processing, Flow Control, Exception Handling, and Filtering within Mule.
- Skilled in using 10+ DataWeave functions for data transformation and mapping including String, Array etc.

Skills

- **Technologies:** Mule ESB, Anypoint Studio, Maven, Anypoint platform, Cloudhub, Munit, Solace, Kafka, Salesforce, Mysql, Snowflake, RabbitMQ
- **Languages:** RAML, WSDL, JSON, XML, JAVA
- **Web Services:** REST, SOAP
- **Tools:** Postman, GIT, Jenkins, nexus, JIRA, WinSCP, Service Now
- **Logging:** Splunk, cloud watch

Certifications

- MuleSoft Developer Level 1
- MuleSoft Developer Level 2
- Solace Certified Developer Practitioner
