# PROJECTS

## 1. GYM MANAGEMENT SYSTEM

**Description:** The purpose of this system is to digitalize and create an automated system. Gym Admin can keep all the records of the customers and send message to them when their fees are due.

**Technology:** Visual Studio Code, Chrome, Html, CSS, Bootstrap, PHP, MySQL

## 2. LIBRARY MANAGEMENT SYSTEM

**Description:** A college library management is a project that manages and stores books information digitally according to student's needs. The system helps both students and library manager to keep a constant track of all the books available in the library. It allows both the admin and the student to search for the desired book. In short, this system completely automates all your library's activities

**Technology:** Html, CSS, jQuery, Java, MySQL

## 3. HACKATHON: WEATHER PREDICTIONS

**Description:** Through weather Api's get the current & future weather details and alarmed to the farmers, so they can take care of agriculture land and many more feature provided like Suggestions, Inventory, Price Predictions etc.

**Technology:** Nodejs, Mongoose, Nodemon, Bcrypt

## 4. HACKATHON: SALESFORCE

Won 3rd rank in this competition

**Description:** Salesforce is a CRM tool and cloud-based platform which brings customers together to perform their task under one roof. It provides various services over cloud such as sales cloud, service cloud, marketing cloud, health care.

**Technology:** Salesforce Tool
