## SUMMARY

**Software Developer with 1.5+ years of experience at JVF Technologies**, specializing in **React-based component libraries** and **internal client projects**. Proficient in **Java, React.js, HTML, CSS, Tailwind CSS, MySQL**, and **Node.js**. Skilled in developing **reusable components, API integration**, and optimizing **frontend performance** to deliver scalable software solutions.

## EXPERIENCE

### SOFTWARE DEVELOPER

JVF Technology, Pune, Maharashtra

August 2023 – Present

#### Responsibilities

- Working on a React project for an internal client tool.
- Worked on a React js based component library.
- Involved in requirement gathering and setting up build pipelines using Git.
- Worked on setting up the basic project structure with Java.
- Designed and developed RESTful APIs in Java to enable seamless communication between frontend and backend systems.

**Technologies – Java, React.js, HTML, CSS, JavaScript, MySQL**

## SKILLS

- Backend technologies: Java, .Net
- Frontend technologies: React.js, HTML, CSS, Tailwind CSS, Javascript
- Development: React.js, Java, API Programming, Git & GitHub
- Databases: MySQL
- Platforms: Linux, Windows, AWS, Docker
- Soft Skills: Problem Solving & Critical Thinking, Leadership, Public Speaking, Writing, Time Management

## EDUCATION

SR.NO	Education	Board/University	Percentage/CGPA	Year of passing
1.	CDAC	CDAC ACTS	62	2023
2.	BE - Computer	SPPU	85.18	2022
3.	Diploma - Computer	MSBTE	82.47	2019
4.	HSC	Maharashtra Board	54.77	2017
5.	SSC	Maharashtra Board	83.40	2015

## CERTIFICATIONS

---

- **CDAC Certification - Advanced Computing Training (2023)**

## PROJECTS

---

- **Title: Hypercube**  
**Platform:** React js, Java, MySQL  
**Contribution:** Frontend Development, MySQL Database Management, API Development  
**Description:** Developed a **customer-centric web application** enabling users to easily find and connect with **architects**. Implemented **React.js** for an interactive user interface and **Java-based APIs** for backend services. Stored and managed **architect information** such as contact details, addresses, and phone numbers in **MySQL** databases. Integrated **search functionality** for seamless data retrieval, enhancing **user experience** and **communication** between customers and architects.
- **Title: Pizza Ordering System**  
**Platform:** Java, React JS, MySQL  
**Contribution:** Frontend Development, API Development, MySQL Database Management  
**Description:** Built a **web-based pizza ordering system** during the **CDAC course** with distinct modules for **admin** and **customers**. Designed **login/logout functionalities** with **role-based access control**. Implemented features to **browse products**, view ingredients, and confirm orders. Developed **REST APIs** to streamline order placement, reduce **manual data entry**, and ensure **data accuracy** and **security** throughout the ordering process.
- **Title: Personalized Campus Virtual Assistant**  
**Platform:** Java, React JS, MySQL  
**Contribution:** Frontend Development, MySQL Database Management  
**Description:** Developed a **virtual assistant web application** to provide students with **personalized information** on **announcements**, **deadlines**, and **campus updates**. Designed **Chatbot functionality** that enables students to ask queries and receive instant information. Integrated **MySQL databases** to store announcements and user preferences, improving **user engagement** and streamlining **campus communication**.

## PERSONAL INFORMATION
