Experience

Interbiz Consulting Pvt Ltd

Nov 2023 – Apr 2024

Software Engineer

Project: RoviCare, Domain: Health and Hospital

- Managing a patient's journey through the care continuum can be disjointed and ineffective. The path to wellness is unclear for patients and their family members.
- Rovicare removes barriers, streamlines care coordination, and enables real-time communication among all stakeholders.

Roles/Responsibility

- Improved multiple pages of the Rovicare project.
- Enhanced the CS Dashboard with actions and mobile responsiveness.
- Refined the incoming page with filters and sorting options.
- Migrated the codebase to ngrx for better state management.

Relive Technology

May 2023 – Oct 2023

Software Developer

Project: Logout Zone

- A comprehensive platform for managing advertising holdings, allowing users to track and control key parameters such as holding sizes, ad durations, pricing, and availability.
- The system also provides insights into the number and distribution of holdings across cities, streamlining the advertising process and optimizing resource allocation

Roles/Responsibility

- Developed login, sign-in, and events pages for the Logout Zone project.
- Conducted testing to ensure reliability and functionality.
- Resolved CSS issues to enhance usability and user experience.

Education

Mats University

Bachelor of Computer Application

2023
