## **Salesforce Consultant**

### **Professional Summary:**

2.5+ years of experience in Salesforce Development. I have been working on Salesforce from the start of my career. Responsible for identifying correct product fitment for key business requirements. Have strong experience in development with Apex, VF, AURA, LWC, FLOWS. Have strong experience in configurations.

### **Experience Summary:**

Working as a Salesforce Developer with **Thunking Tech, Surat** Dec 2021 - Present.

#### **IIA Work Order: (Duration 4 months)**

Built a complex form on LWC reading all the boiler fields. A supervisor shall open this form, perform the necessary tests on the boiler and fill the reading in the form. This form was generic to pick all the fields of multiple types and later convert it into pdf. We also have form edit options which involved fields from more than 5 different objects.

#### **Role Description:-**

- Account Management, Contact Management, Opportunity Management, Quotation Management, Service Management, Vendor Management, Case Management, Project Management and Target management.
- Email Automation for the users and customers.
- Reports and Dashboards.
- Web to case and email to case configurations.
- Responsible for PDF Generation.
- LWC to add products for customers.
- Project Management to track the post sales services.

#### **Aurea Green Field: (Duration 6 months)**

Worked on Mailchimp Integration to trigger campaign emails to the subscribers, established the full setup from end to end. Migration of existing data and attachment from salesforce to another salesforce org.

#### **Role Description:-**

- Involved in Salesforce.com Application Setup activities and customized the apps to match the functional needs of the organization.
- Worked with various salesforce.com objects like Accounts, Contacts, Leads, Campaigns, Reports, and Opportunities, to transfer the data
- Created page layouts, search layouts to organize fields, custom links, related lists and other components on record detail pages and edit pages.
- Created workflow rules and defined related tasks, time triggered tasks, email alerts, field updates to implement business logic.
- Created Email templates, approval processes, approval page layouts and defined approval actions on them to automate the processes.
- Used SOQL with in Governor Limits for data manipulation needs of the application using Force.com Explorer.
- Created users, roles, public groups and implemented role hierarchies, sharing rules and record level permissions to provide shared access among different users.
