Master of Computer Application University of Hyderabad

10/2022 - Present

Hyderabad, India

- Lung Cancer Classification using CT scan image dataset
- Chat Application using RAG

Bachelor of Computer Application Vivekanand Institute of Management & Technology

08/2018 - 09/2021

Percentage: 76.9

Higher Secondary

Shivaji Shiksha Niketan Inter college

04/2016 - 06/2018

Percentage: 82.8

Etawah, India

- Physics, Chemistry, Mathematics, Hindi and English

PROJECTS

Lung Cancer Classification using CT scan dataset

University of Hyderabad

07/2023 - Present

A lung cancer classification project utilizing CT scan data. Employed various CNN models to effectively classify lung cancer in chest images from the LIDC IDRC dataset, resulting in an impressive 98% accuracy rate.

Chat Application using RAG University of Hyderabad

09/2023 - 10/2023

Created a chat application that utilizes RAG in combination with the Pinecone database, enabling us to generate responses from the LLM model using the custom dataset we've supplied.
