**Result-oriented and Energetic Sr. Software Engineer with an intensive years of experience in the IT Software Industry. Looking to explore and experience new challenging roles where I can add some value to the company.**

## Experience

- **Senior Software Engineer**  
**Total Experience: 2.3 years**  
**Location: Pune (India)**  
Apisero Inc(NTT Data) (Sep/2021-Present)
  - Working as a **certified Mulesoft developer** .
  - Worked as Consultant in the client project for various Integration.
  - Experience in Dataweave 2.0, Anypoint MQ, pub-sub pattern, batch processing-ETL.
  - Worked on various connectors like **salesforce, SFTP, FTP, Database, Email, Netsuite, etc.**
  - Followed **best practices** recommended by Mulesoft.
  - Hands-on experience in **Identify, analyze, develop interfaces, mulesoft flow Munit tools, Jenkins CICD framework** and some other connectors.
  - Experience in designing **RAML** spec, building APIs using APIKit in Mule application.
  - Source code repository management using best practices.
  - Experience in API Policy enforcement.
  - SSO implementation using Azure and okta

## PROJECT EXPERIENCE

- **Client 1: (20 September 2023 - Present) Australian Client**  
**Role: Senior Consultant**  
**Responsibilities:**
  - Design and develop api for the various usecases.
  - Bidirectional Sync between two endsystem.
  - Sync of data between BambooHr and Keypay.
  - Caching of the data.
  - RAML design and implementation.
  - Creating an email notification for the errors.
  -
- **Client 1: (8 March 2023 - 02-September-2023) American Client**  
**Role: Consultant**  
**Responsibilities:**
  - Design and develop api for the various usecases.
  - Bidirectional Sync between two endsystem.
  - Periodic sync between salesforce and oracle database.
  - Worked on Zendesk system to trigger a ticket in case of record-failure.
  - Implemented JSON logger and best practices.
  - Deals with realtime sync of the data.
  - Mulesoft error catalyst for handling errors at the system api.
- **Client 2: (9 Januray 2023 - 26 May 2023) American Client**  
**Role: Consultant**  
**Responsibilities:**
  - Design and develop api for the various usecases.
  - Use of **X12 connector** to read the X12 files.
  - Perform unit testing using munit.
  - Implement best practises while implementing the APIs

- Use of **Anypoint MQ** for reliability and reprocessing when a transient error occurred.
- Implement **circuit breaker** policy for the transient errors.
- Implement **common error handling** for all types of errors.
- Data migration from file drop point to Netsuite.

- **Client 2: (17 July 2022 - 23 December 2022) Canadian Client**  
**Role Consultant**

**Responsibilities:**

- Demo on Munits tools and its best practices.
- Review the code and analyze the loopholes in current approaches.
- Perform the demo on CICD using Jenkins with **Pipeline , Multibranch pipeline and Organizational Folder**.
- Provide suggestions to the client to make the existing code efficient.
- Implement the **Identity provider** for Anypoint platform using Okta.
- POCs on Batch ETL process and vm queues.

- **Internal Project: 1 (May 2022 - June 2022)**

**Problem Statement:** Client have to migrate the data from source system to target system. Records may be huge and real time sync.

**Responsibilities:**

- Design and develop the APIs.
- Implement the **water level** concept to read the unprocessed data from the end system.
- Use the **circuit breaker** concept using **groovy script** (execute connector).
- Use of **external logging tool** (splunk) for analysis.
- Perform Unit testing using munits.
- Use of **JSON logger** for better logging capabilities.
- Implement **ping** and **healthcheck** concept of an API.
- **Externalize** the dataweave where required.
- Implement **Single SSL** for the system API
- Email connector to trigger a mail when the circuit is open.

- **Internal Project: 2 (March 2022 - April 2022)**

**Problem Statement:** Client have to various source system and target system and this source and target are elastic such that a source with respective target may be removed or may be added. Each source and target have a specific data the need to be migrated.

**Responsibilities:**

- Design the architecture that implement the usecase.
- Design and develop the APIs.
- Design the RAML for the system apis.
- Perform Unit testing using munits.
- Use of **JSON logger** for better logging capabilities.
- Implement **ping** and **healthcheck** concept of an API;

## TRAINING / CERTIFICATION

- **MuleSoft certified developer** - Level 1 (Mule 4) and **Mulesoft Integration Associate** certified
- Various certificate of recognition(Internal Award).
- Programming basics Certificate from **IIT Bombay** with **A+ grade**.
- Data structure and OOPS training from SD Bansal College of Technology.
- Problem Solving(Basic) Certification from HackerRank

## TECHNICAL SKILLS

- Design, develop, test and deployment of Mule Applications, Rest API, SOAP API, Jenkins, Github, Azure Devops, Salesforce.
- Junit- Java Specific, Munit- Mulesoft Specific
- RAML, Dataweave, Java (Core), basic of C++ and C
- SQL, Data Structure,OOPS.

## KEY STRENGTHS

- Consistent Performer, Problem Solver, Easily Adaptive, Team Player

#### ACCOMPLISHMENTS / EXTRA CURRICULAR ACTIVITIES

- Written **Blogs** for the current Organization.
- Knowledge sharing session's speaker.
- Achieved **Silver medal** and certificate in 1<sup>st</sup> year for getting higher CGPA.
- Received certificate in **Debate and Quiz** competition from DAVV.

#### PERSONAL SNIPPETS

Father's Name : Mr. Ghanshyam Mali  
Mother's Name : Mrs. Lakshmi Mali  
Address : Ward No- 33, Behind Railway Hospital, Neemuch(M.P)  
Languages Known : English and Hindi

#### SELF-DECLARATION

I hereby declare that the information mentioned here is true to the best of my knowledge.
