## SUMMARY

Integration Consultant with **2+ years** of experience in designing and developing APIs to connect SaaS and enterprise applications.

## WORK EXPERIENCE

### 1. Apisero Inc part of NTT Data

Sep 2021 – Present

#### Senior Software Engineer

- Participated in requirements gathering sessions with Solution Architect, Business Analysts, and functional users to create a layered architecture design with API-led connectivity.
- Worked with **5+ clients** and delivered multiple use cases to production.
- Communicate effectively with customers, internal customers, peers, and other project teams to maintain system reliability and availability.
- Experience in building complex Mule Flows, RAML, Scopes, Error Handling strategies, Message Filters, Validation, Transformation, Message Enricher, and flow Controls.
- Created API Design Library, and Common Mule Application Template structure for API implements.
- Implemented robust exception handling and logging for mule application.
- Utilized various CI / CD tools like Jenkins, GitHub Actions, and Azure DevOps during the deployment to Mule Runtime on CloudHub.
- Actively involved in Pre-Production and Production deployment activities.
- Followed Software Development Life Cycle (SDLC) including Requirement Analysis, Design, Development, and Testing of the MuleSoft applications. Having a good understanding of Object-Oriented Programming concepts.
- **Connectors:** Salesforce, NetSuite, Azure Services Bus, Azure Key Vault Connector, AD Storage Account, AWS S3, Database, Snowflake, REST API, SOAP WSC, Pardot, HTTP

### 2. Web Development Intern

March 2021 – Jun 2021

#### The Spark Foundation, Remote

#### Project: Indian Oxygen Crises

[View in GitHub](#)

- Developed a website for payment gateway integration using React.js, node.js, and InstaMojo.
- This website allows you to donate money to support those in need and combat the Indian oxygen crisis.

## PROJECT:

### Sonifi Solutions

#### MuleSoft Consultant

- Worked on **Salesforce->NetSuite(11v)**, **DB->Snowflake** use cases.
- Designed, Developed and Deployed NetSuite, Salesforce, Database SAPI, and Process API's.
- Used JSON logger for monitoring and tracking logs.
- After deploying the code to production, no issues or defects were raised by the client.
- Perform Munits, success and failure test cases document and provide demo and KT to client.

### World Pet Association

#### MuleSoft Solution Consultant

- Worked on **Personify <-> Salesforce**, **CustomReg <-> Salesforce**, **Pardot** (Prospects) use cases.
- Designed, deployed, managed, and monitored Mule 4 applications using Anypoint Platform Tools like Design Center, API Manager, Exchange, and Anypoint Runtime Manager.
- Deployed application using GitHub Actions CICD to CloudHub 2.0.
- Used ClientID enforcement policy to secure API. Consume SOAP web services.
- Handled all possible error scenarios, reprocess transient error, and send cloudhub notifications email for permanent errors.

### The Heico Company

#### MuleSoft Solution Consultant

- Worked with **Klaviyo -> Salesforce**, **UKG(HR) -> Azure Active Directory** use cases.

- Involved in requirement gathering sessions to understand the project requirements.
- Design and Developed Kalviyo , UKG SAPI, Process API and handled all possible error scenarios and reprocessed the transient errors. Used JSON logger to Monitor the logs.
- Converted 15 UKG SOAP Reports into reusable APIs to use across all Heico groups.
- Deployed application using Azure DevOps CICD to CloudHub 2.0.
- Documented Low level design, Sequence Diagram, Test Cases, Postman collection.

## EDUCATION

**JSPM BSIOTR COLLEGE OF ENGINEERING, PUNE UNIVERSITY**  
*Bachelor of Engineering (B.E.) - Computer Science*

**2017 – 2021**  
**7.8 CGPA**

## SKILLS & INTERESTS

|                   |  |
|-------------------|--|
| Languages         | Java(core), C++, Python  |
| Queue             | VM Queue, Azure Queue  |
| Anypoint Platform | Anypoint API Designer, CloudHub, Runtime Manager, Studio, RAML, API Manager, Design Center, Exchange, Monitoring                             |
| CICD              | Azure DevOps, GitHub Actions,Maven   |
| Tools             | Anypoint Studio, Eclipse, Postman, VsCode, Git Desktop, Git Bash, Arc, Jenkins UI, DBeaver, Netbeans,SOAP UI, Salesforce Developer/Workbench |
| Database          | SQL, Oracle, Mysql   |
| VCS               | Git, Github, GitBash, Azure DevOps, Bitbucket  |
| Other             | React, Nodejs, HTML, JS, Bootstrap   |

## CERTIFICATION

- MuleSoft Certified Developer Level 1 and Level 2
- MuleSoft Integration Associate
- SQL Cognitive Class by IBM
- JAVA Certificate from Udemy and HackerRank
