- Mulesoft certification and mastery with a deep understanding of RAML development, Anypoint Studio development, Dataweave scripting, and Anypoint Platform administration, and CloudHub
- Proficient in Java (related to Mulesoft), Maven
- Familiar with Linux, GIT, CI/CD, testing, and splunk logs monitoring
- Excels at both independent and collaborative work
- I'm a Self-motivated personality, problem-solver with a passion for learning
- Proven track record of mentorship, collaboration, and communication

Projects Description

- Project: **E.ON S.A., Germany** **01-Feb-2022 to Present**
Role: MuleSoft Developer
Location: **Wipro Technologies, Hyderabad**
Domain: Utilities
Team Size: 7
Description: As a Technical consultant, we need to maintain systems in Production and Quality Environments. Need to monitor the central Mailbox for the support team, alert monitoring inbox for errors. In addition we monitor error dashboard in splunk to pro-actively react to issues in Production. We also handle MR's, CR's (changes in existing code, and their deployments to Non-Prod and Prod environments). Working on issues in the Production environment – checking the message failures on request, change in configuration if necessary.
- Project: **Waitrose, UK** **01-Oct-2020 to 15-Dec-2022**

Role: MuleSoft Developer

Location: Deltrasoft Technologies, Hyderabad

Domain: Retail

Team Size: 5

Description: As a developer, I need to interact with Business Analysts and gather the inputs and new features to be developed in the current release. Debugging the issues and solving the incidents which were raised as part of Production Monitoring. Need to maintain and monitor the connections between the Source Systems to MuleSoft like Salesforce, SAP, AWS, IAM. Apart from technical roles, creating and maintaining the documentation works and training the new resources into the project were also handled.

- Project: **GlaxoSmithKline, U.K**

20-Feb-2019 to 12-Sep-2020

Role: MuleSoft Developer

Location: Deltrasoft Technologies, Hyderabad

Domain: Health

Team Size: 10

Description: As a part of the development team, created APIs from scratch and implemented the business logic as requested by clients and deployed to CloudHub. Followed agile methodology and released two sprints per month by implementing the code and taking reviews from Business Analysts. Interacting with solution architects and process leads from Client for approvals of build and related documents. Reviewing documents developed by other team members and signing off for further steps

- Project: **Louis Dreyfus Commodities, Brazil**

01-Sep-2018 to 06-Feb-2019

Role: MuleSoft Developer

Location: Deltrasoft Technologies, Bangalore

Domain: Consumer Goods

Team Size: 1

Description: As a developer I need to develop and implement the code logic using Anypoint Studio and deploying the code to Cloudhub while pushing the code to Git. Need to monitor the error dashboard and work on resolving Incidents including high priority, providing RCA for issues. Need to change the configurations as a part of bug fixes.

Professional Achievements

- Received best performer from the team for stabilizing the team in tough periods.
- Received appreciation for handling incidents individually in MuleSoft as part of EON, Germany project.
- Received appreciation from Client (Waitrose) for development work in MuleSoft.

- Received appreciation from manager for active participation in project related activities, EON, Germany.
- Received appreciation for solving the production issue in MuleSoft as a part of EON, Germany.
- Received appreciation from Management team – EON, for active participation in project related activities and picking up and working on technical work in less time.
- Received Customer appreciation for presenting project related information.
- Received 4 times recognition awards from the team.

Academic Qualifications

- M.Tech from J.N.T.U Hyderabad, 2018 with 8.68 CGPA.

Declaration

I hereby declare that all the details furnished above are true to the best of my knowledge.
