## Senior Lead Engineer

Experienced professional with over 10+ years in API management and Agile projects. Led teams to successful project completion, mentored junior developers, and implemented agile principles, resulting in streamlined delivery in just a few months. Proficient in documentation and delivering technical solutions.

## SKILLS

Anypoint Platform, TIBCO ActiveMatrix BusinessWorks, Batch Processing, Cloud Hub, GitHub, JIRA, Bulk API v2, Salesforce connector, Munits, Dataweave, Jenkins, Artifactory, Sonarqube, Runtime Fabric, New Relic, API manager, Access Management, Monitoring

## WORK EXPERIENCE

### NTT DATA North Americas(formerly Apisero ) Senior Lead Engineer

04/2020 – Present

- Leading technical team through multiple phases of delivery and providing hands-on delivery guidance to influence standards for development, governance, and operational life cycle.
- Implemented reusable code templates, reducing development time and ensuring consistent standards, enhancing team productivity.
- Effectively managed the migration of Customer's integration platform from Dell Boomi to MuleSoft, enabling seamless Agile project delivery and ensuring alignment with End to End Project Lifecycle processes.
- Re-engineered monolithic design to API-Led Connectivity, resulting in improved maintainability and scalability for the middleware/integration solution.
- Implemented canonical data model that led to easy onboarding of new backend systems and gradually retired legacy system
- Implemented Optimizations in coding to improve resource utilization
- Implemented common framework of error recategorization in dataweave that led to 40% error reduction and improved agent's experience of the platform and reduced developer's effort
- Improvised common error handling to create alert for important use-cases
- Implemented externalization of mulesoft api logs into New Relic and created dashboards for stakeholders to track
- Created functional monitoring alerts, heart beat calls in all APIs and Platform alerts to monitor the overall health of the Platform
- Applied integration design patterns such as message routing, content enrichment, batch processing, error handling and reconciliation mechanisms to deliver required functionality

- Applied agile principles leveraging JIRA to capture requirements, track progress, and ensure project success.
- Mentor junior developers on the team.
- Adept at Development, testing, debugging, and documenting MuleSoft-based flows and integrations.

## IBM India Pvt. Ltd.

07/2013 – 04/2020

### Tibco Application Developer

- Interacting with client team for end to end interface design and requirement refinement.
- Development of code in TIBCO Business Works
- Integration solutions for SAP, EDI, MQ-FTE, MQ based systems.
- Extensively worked on design and development of interfaces and their testing for smooth transition from build phase to production deployment
