❖ Analytical Ability

PROJECT HANDLED

As a Front-end developer, I've worked on six projects within one year. In our every project, I've used flutter and dart to build our application. Moreover, I've used api protocols for, clean architecture to maintain the code so that anybody can pick up easily, GetX for state management & SQLite for local data storage.

RetailEcosS Client Assist

It is a mobile application Offers online shopping for customers from the comfort of his home and shopping at the store with self-checkout avoiding queues at till. And I've done the followings

- New Restaurant Configuration.
- Mobile Number Based Authentication.
- QR Scanning.
- internalization.
- Wishlist and Cart Maintenance.
- User Configuration.

RetailEcosS - SA(Sales Assist)

RetailEcosS stands for Retail Ecosystem Solutions - the technology Ecosystem consists of a suite of applications addressing the needs of different verticals of Retail Businesses especially for the SME sector.

And My Contribution in this was

- Vertical Configuration.
- Menu Creation And Vertical Mapping.
- Ui designing.

Cafe Coffee Day – Maintenance App

A maintenance Application for Billing and Overall Sold Reports.

- User Login Module.
- Daily, Monthly, yearly Summery Report.
- Database Configurations.
