Summary

- 9+ years of experience in IT with a focus on Mulesoft Anypoint development, API-led connectivity and data integration across complex systems like Salesforce, Netsuite, SAP and Google BigQuery.
- Expertise in building scalable, reusable APIs, leading high-impact projects using Agile methodologies.
- Led numerous ETL process development projects for data migration and integration, ensuring seamless data flow between systems.
- Proven track record in conducting data audits, cleansing, and de-duplication to improve data quality and reliability.
- Strong leadership and mentorship skills, managing cross-functional teams, guiding juniors through technical growth while aligning project goals with company objectives.
- Experience managing multiple projects simultaneously, providing strategic direction and resolving technical dependencies for timely delivery.
- Skilled in client collaboration, gathering requirements, and delivering customized technical solutions that meet business needs.
- Experienced in leading a team, creating technical design documents, API reference materials, and providing post-production support to ensure smooth project deployment.
- Expertise handling and delivering projects in Finance, Healthcare, HR and Non-profit domain.

Technical Skills

- Mulesoft & API Development
Mulesoft Anypoint Platform, Mule 4, Dataweave 2.0, Mulesoft IPD, Mulesoft RPA, RAML, Munit
- Integration & Data Management
Salesforce, Netsuite, Google BigQuery, Google Chat, SAP system, Oracle 9i/11g, MS Sql Server
- ETL & Data Transformation
Informatica PowerCenter, MSBI-SSIS, PI/Sql, Toad for Oracle/ Sql server, AQT, Tableau Server 8.3, Tableau Desktop 9.1
- DevOps & CI/CD Tools
Jira, Confluence, BitBucket, SourceTree, Jenkins, Bamboo, XLDeploy, CA Workload Automation

Certifications

- MuleSoft Certified Developer - Level 1 (Mule 4)
- Mulesoft Certified Hyper-automation Specialist
- Salesforce Certified Administrator

Educational Qualification

- 2015: Bachelor's Degree in Computer Science with aggregate 8.1 CGPA

Work Experience

	Latest Designation	Company	Tenure
•	Senior Integration Specialist	RafterOne	Nov 2022 – till date
•	Application Development Specialist	Accenture	Sep 2021 – Nov 2022
•	Senior Integration Developer	Traction on Demand	Dec 2019 – Sep 2021
•	Technology Analyst	Infosys Ltd	Aug 2015 – Dec 2019

Project Experience

1. Mulesoft Team Lead, December'2022 – present

Project: Real-time integrations between multiple SF orgs and Vendor systems

- Architected and led a bi-directional integration framework to ensure successful execution and acknowledgment across Salesforce orgs and vendor systems.
- Designed a scalable API architecture using MQ Queues to facilitate smooth payload transfer between systems, optimizing real-time data synchronization.
- Integrated complex Salesforce requests utilizing the Salesforce Composite Connector, enabling efficient processing of multiple requests in a single call.
- Developed a layered API-led connectivity model consisting of 12 APIs organized into Experience, Process, and System layers, enhancing modularity and scalability.
- Achieved 90% code coverage through the implementation of MUnits, ensuring robust testing and reliability of the APIs.
- Collaborated directly with clients during requirement-gathering sessions to align technical solutions with business needs, ensuring project success and client satisfaction.
- Led production deployment activities and provided comprehensive post-production support to ensure seamless project execution and system stability.

2. Mulesoft Developer, December'2022 – March'2024

Project: Complex multi-system integration with Financial Data

- Led the integration of Netsuite, Salesforce, Google BigQuery Database and Google Chat Channels streaming data flows and improving system interoperability.
- Worked closely with clients to gather and understand business requirements, translating them into comprehensive technical solutions for seamless integration.
- Implemented integration between Netsuite and Salesforce into BigQuery, where aggregated data is processed to generate customized messages in Google Chat through integrations.
- Designed and deployed error-handling frameworks, including custom error handlers, to manage system failures and trigger real-time email alerts and Slack notifications improving error resolution efficiency.

3. Mulesoft Developer/ Team Lead, October'2021 – November'2022

Project: Data Integration between multiple systems to handle health care data

- Leading a team on offshore while having daily standups with onshore to gather information for requirement analysis and building forward to finalize Design and Development.
- Current projects consists of integration between Salesforce Health Cloud, Salesforce Sales Cloud, flat files, sftp servers and amazon S3.
- Hands on experience while designing, developing and managing api's.
- Experience in integrating api's using api led methodology and implementing error handling for the integration.
- Expertise while working with Mule connectors, scopes, loops and data payload transformations using dataweave.

4. Mulesoft Integration Specialist, January'2020 – September'2021

Project: Data Integration between CRM systems to handle financial data

- Leading a team with direct interaction with Client to gather information for requirement analysis and building forward to finalize Design and Development.
- Following SDLC approach of Mulesoft API Led methodology.
- Experience in designing and developing RAML based APIs using Anypoint API Platform.
- Hands-on with Mule 4 and Anypoint Platform to work on API development lifecycle
- Experience in building complex Mule Flows, Scopes, Error Handling strategies, Validation and transforming data using dataweave 2.0
- Developing api's to build integration between CRM Salesforce, Oracle Netsuite and Sql Servers while following api layers approach of experience, process and system.
- Experience with creating MUnits to automate testing.

5. ETL Developer at Offshore, January'2018 – December'2019

Project: Data warehousing and migration project to maintain historical tables to analyze retirement plans trends of customers

- Leading a team as a team lead and direct interaction with onshore team.
- Parsed high-level design specification to simple ETL coding and mapping standards.
- Worked on Informatica Power Center tools - Designer, Repository Manager, Workflow Manager, and Workflow Monitor.
- Developed informatica data pipelines and its corresponding sessions and workflows while working with various sources i.e. flat files, excel sheets, Oracle/ MS Sql Server Db Tables.
- Proficiency in writing complex sql queries to be used in source Qualifier.
- Experience developing reusable transformations and mapplets.
- Proactively involved in unit testing phase and knowledge transfer sessions with testing team.
- Experience with deployment phase of SLDC using tools i.e. Jira, Confluence, SourceTree, BitBucket, Jenkins, Bamboo, XLDeploy, AutoSys, CA Workload.
