SKILLS

Github

Linux

Data Structure and Algorithm

Android Development

Flutter

Problem Solver

Data Visualisation

SQL(Basic)

Innovation

PROGRAMMING LANGUAGES

Java

Professional Working Proficiency

Python

Professional Working Proficiency

INTERESTS

Reading Book

Explore New Technology

Cryptocurrency

Listening music

Travel and Explore Place

EDUCATION

Bachelor of Technology

Lovely Professional University

08/2018 - Present

Phagwara, Punjab

Courses

- Computer Science and Engineering

Senior School Certification Examination

Kendriya Vidyalaya

03/2016 - 04/2018

Chandimandir Cantt, Chandigarh

Courses

- Non-Medical

PERSONAL PROJECTS

Movies List Application (05/2021)

- This application is Develop using **Flutter**.
- I have designed this app in such a way that anyone can get proper details of movies which is present in the database.
- The UI of this app is Elegant and Responsive.

Sentiment analysis tool of Twitter (11/2019)

- In this project, I have used **Python Programming Language**, in which tweepy helps to develop this Interesting Project.
- We can analyse any Tweet using this tool.
- In which this tool will generate a number on the basis of language used in the particular tweet.
- 1.0 is for good tweet or Positive tweet and if it is less than 0.5 means Negative Tweet.

Store Management System (04/2019)

- This application is developed using the **C++ Programming Language**.
- This application design in such a way that it will store the stock of present item in the store.
- Application design for Regular user as well as Admin User.
- Admin User can Modify stocks prices of any item, while Regular user just can buy and see the items.
- In Addition, software will speak the name of particular item which is selected by Customer.
