Winable By Winjit

Jan 2024 – Mar 2024

Full Stack Developer Intern

Nashik, Maharashtra

- Collaborated with design and backend teams to create user-friendly, responsive, and visually appealing interfaces for web applications..
- Developed a Django-based application with full CRUD functionality for managing entity.
- Built back-end with Django MVT architecture and ORM for database management. Designed responsive front-end with HTML, CSS, JavaScript and Bootstrap.

Projects

Product Management for E-Commerce Website | HTML, CSS, JavaScript

- Developed an automatic bot using Python and Google Cloud Console to register myself for a timeslot at my school gym.
- Implemented Selenium to create an instance of Chrome in order to interact with the correct elements of the web page.
- Created a Linux virtual machine to run on Google Cloud so that the program is able to run everyday from the cloud.
- Used Cron to schedule the program to execute automatically at 11 AM every morning so a reservation is made for me.

EDA-Google Play Store | Python,Numpy,Pandas,

- Conducted Exploratory Data Analysis (EDA) on the Google Play Store dataset (10k apps) from Kaggle.
- Utilized Python libraries like Pandas, NumPy, and Matplotlib for data loading, manipulation, and visualization to uncover patterns and trends.
- Performed extensive data cleaning and preprocessing, including handling missing values, removing duplicates, ratings, downloads.

Clone Of Zerodha | HTML,CSS,JavaScript,Angular

- Created an Zerodha Website clone using Frontend and the aim of this project is to make a replicate of Zerodha.com.
- As a huge fan of Zerodha innovative approach to online trading, I wanted to challenge myself to recreate their user interface using Angular.
- I designed and implemented the UI components, layout, and styling to match Zerodha website the look and feel of the original site.
