Objective

Results-driven MuleSoft Developer with 3 years of expertise in designing and implementing integration solutions. Seeking to leverage technical acumen and proven track record in driving seamless data connectivity and process automation for a forward-thinking organization

Summary

- Possess MuleSoft Certified Developer certification (MCD-L1), attesting to expertise in Anypoint Platform and Anypoint Studio.
- Proficient in developing applications with RESTful Web Services.
- Skilled in the design and implementation of integration applications using Mule ESB.
- Successfully executed three freelance projects spanning diverse technology stacks.
- Proficiently manage source code using VCS tools like Github and Bitbucket.
- Exhibit strong interpersonal skills, unwavering motivation, and a collaborative team spirit.

Experience

October 2020- PRESENT

NTT Data, Pune- *Digital Engineering Engineer*

- Architected, developed, and maintained MuleSoft integration applications using Anypoint Studio.
- Engineered and optimized RESTful APIs for data exchange between diverse systems, resulting in a 20% increase in operational efficiency.
- Collaborated closely with cross-functional teams to gather requirements, conduct system analysis, and provide integration solutions that aligned seamlessly with business objectives.
- Led and orchestrated a team that pioneered the development of a reusable EDI document converter, reducing implementation time by 30% for projects involving EDI operations.
- Implemented and enforced best practices for error handling, logging, and monitoring to ensure the rock-solid reliability and stability of integration processes.
- Engineered performance enhancements and resolved issues to dramatically enhance integration performance and reduce latency.
- Participated in code reviews and mentored junior developers in best practices for MuleSoft development.
- Identified and enhanced areas of modification in existing code, yielding substantial improvements.
- Orchestrated the seamless integration of third-party applications and systems, including Salesforce and SAP, streamlining data flow and business processes.
- Managed deployment processes using MuleSoft's deployment tools, including CloudHub.
- Automated internal "Resource Management, slashing manual effort by 40 hours per week, resulting in a remarkable 50% reduction in process time and a significant boost in team productivity.
- Remained at the forefront of the latest MuleSoft advancements and best practices, continually propelling integration solutions forward and fostering innovation.

December 2019- June 2020

Staqwise, Pune- *SDE Intern*

- Immersed in learning sessions and training programs to attain new technical skills.
- Contributed to software development by writing code, debugging and resolving coding issues under the guidance of experienced team members.
- Collaborated closely with senior developers to scrutinize and enhance code, adeptly identifying areas of optimization.
- Executed thorough testing cycles to ensure uncompromising quality and reliability.
- Generated and upheld comprehensive documentation for code, software configuration, and development processes, streamlining knowledge sharing and future reference.
- Provided dedicated support for existing software, promptly addressing user-reported issues.

Education

June 2018- April 2020

Fergusson College, Pune- *Master of computer science.*

Certification

Mulesoft Certified Developer-L1
