- Diploma in CSE from JK technical board Education
- 10th from JK BOARD

EXPERIENCE

Six months project on online auction system at Solitaire infosys pvt Ltd (jan-june2024)

- **Title :** Online auction system
- **Languages :** Java,Html,CSS
- **Option :** Seller and Buyer
- **platform :** Eclipse
- **Project description**

"**Auction Depot**" is an online auction web site aimed at taking the auction to the finger tips of aspiring bidders there by opening up the doors of the "OPEN Auction House" to a wider cross

section of Art Lovers, Vehicle Lovers(Cars, Bike, Scooters, Cycle etc.) ,Digital Electronics products(Phone, Phone Accessories) and Antique Collectors. This site also acts as an open forum

where buyers and sellers can come together and exchange their products. The site makes sure that the sellers get a fair deal and buyers get a genuine product.

Home Page : The site opens up door to aspiring web users through the Home page. The Homepage

is designed in such way that the layout is as user friendly as possible. There is a navigational menu at the top of the page which links to various inner pages. There is

a category drop down on the left side for easy manipulation.

Login/User Registration : Those who wish to take part in bidding or sell products at the site have

to register at the site as seller or buyer. Only authenticated users can take part in selling or in

bidding. The system automatically rejects un-authenticated users who try to bid or sell at the site.

Register Products : This module is for presenting items for bidding. Only those who have registered

and authenticated as sellers can place their articles for bidding. The Module collects information

like Product Name, Product Details, Starting Bid amount, Incremental value etc. The system

automatically inputs the closing date.

Bidding Module : The module is for bidding on any selected item. The bidder has

to authenticate before participating in bidding. The system checks whether the incremental amount entered by the bidder is equal or more than the incremental minimum set during

the product registration time. The system places the record in the bid history against the bidder account.

Web Admin : This link opens to the administration module which is open to web administrator

only. Here site administrator can add product categories and can edit product information like

closing date. Also there is an option for administering the closed bids. This module is for contacting

the bidder and seller by email instructing them to settle the transaction within a time frame.
